

Agata Orminska

Full Stack Developer

Hello, I'm a freshly graduated fullstack developer. Before diving into coding I've worked as a BIM Architect (Revit, Autocad). My architectural background turned out to be a huge help in programming. I am very good at managing deadlines, organizing my work and work of my teams and splitting tasks into more manageable bites. I also work very well under pressure.

I've used various programming tools based on JavaScript but I am always willing to require new skills. I have a strong attention to detail and can create efficient and effective solutions.

I like working with people and I always try to create a pleasant environment. I am eager to contribute to a dynamic team and grow as a developer.

Work Experience

JUNE 2016 - SEPTEMBER 2016
