

Agata Ormińska

Full Stack Developer

Hi, I'm Agata. I've recently finished Full Stack developer bootcamp. Before that I've worked as an Revit Architect. My architectural background turned out to be a huge help in coding, organizing my work and splitting tasks. I'm very good at managing deadlines and working under pressure.

I've used various programming tools and frameworks based on JavaScript. Currently I'm learning Typescript and GraphQL but I'm always willing to require new skills. My strong attention to detail and problem-solving ability allow me to create efficient and effective solutions. I like working with people and I always try to create a pleasant environment. I am eager to contribute to a dynamic team and grow as a developer.
